

STRANDED COPPER WIRE

STRANDED COPPER WIRE

The high conductivity of copper has made it one of the most preferred metals in the electricity production and transmission solutions. The copper wires have been used in a variety of shapes and forms throughout the industries. There are number of manufacturers of these types of wirings but only a few like BHAGYADEEP CABLES industries have been able to win the trust of customers thanks to their supreme quality and reliability.

Stranded Copper Wire which are available in a number of shapes. However, the round one is one of the most popular due to its high utility. This type of wires is known for their high tolerance to vibration and expansion of heavy production machines. Moreover, their flexibility plays a vital role in their wide spread use in the form of connectors. We manufacture the stranded flexible copper wires in a variety of specification and designs as desired by the clients.

The copper stranded wire is used as flexible jointing wire in electric transmission and distribution appliance (such as volt transformer, electric stove), electronic equipment and thyristor etc, it also could be used as grounding wire in electric working.

BHAGYADEEP

STRANDED COPPER WIRE

Our years of experience in this domain and a world class Manufacturing facility has provided us with an expertise in the Manufacturing of highly flexible wires in almost all shapes and sizes. We also offer customized high flexible copper wire as per the needs and requirements of the different industries and clients. We have a dedicated team of quality checkers and controllers who make sure whatever is coming out for sales are completely flawless. This is the reason why we are among the most preferred for not only Manufacturing but also for the supply of wiring products. The complete process of Manufacturing from the processing of raw materials to packaging has been taken care of by highly qualified engineers and professional.

BHAGYADEEP provides Copper products such as Bare Copper Wire, Tin Coated Copper Wires & many other related products.
